Guaranteed Flat Roof Solutions

Sarnafil Roof Assured

1

GUARANTEE

We provide a guarantee for 10 or 15 years, covering both the Sarnafil membrane and Sarnafil ancillary products used within the installation. Ask your installer about an additional Independent Insurance Backed Guarantee which can provide you with deposit cover and post completion insolvency cover for 10 years.

Whatever your flat roofing requirement you can be confident that a Sarnafil Roof Assured installation will provide you with a solution that looks good and provides lasting performance: performance that is independently certified to have a life expectancy in excess of 40 years*. This, and our unique 5 point Customer Pledge, has led to thousands of happy customers and regular features on leading home improvement programmes such as Grand Designs and Property Ladder.

2

QUALITY INSTALLATION

Sarnafil Roof Assured products are only supplied to Registered Installers to help you get the best possible roofing solution. Sarnafil Roof Assured Installers are trained at Sarnafil's Training & Assessment centre, in Norwich, and each trained fitter is issued with an identity card carrying their photograph, qualification level and expiry date.

3

AESTHETICALLY PLEASING

With a range of colours, aesthetic profiles and complementary edge trims, we can provide a solution that is sympathetic to your property. We can simulate a traditional lead or copper appearance, and we can also help you benefit from a roof terrace or garden roof.

4

ENVIRONMENTALLY FRIENDLY

Our membranes are manufactured in Switzerland to ISO14001, the international environmental production standard. This ensures that Sarnafil membranes have minimal impact on the environment. All our membranes are recyclable and each new m² contains a percentage of recycled membrane.

5

VALUE FOR MONEY

Our products have a life expectancy in excess of 40 years*, require virtually no maintenance and are installed by trained experts. We can even improve the thermal efficiency of your home with high performance thermal insulation. Combined, these elements provide you with the best possible value for money.

Traditional Problems and Roof Assured Solutions

Problems

UV radiation and building movement can cause cracks, splits and blisters in traditional felt. Failure can also result from poor design or installation.

Investigation (SURVEY)

Only by undertaking an investigation of the roof build up and condition, can problems be identified and recommendations be made for remedial action.

Preparation

Correct preparation is critical to the provision of a long-term roofing solution that solves your roofing problems.

Installation

Installed without naked flames, hot bitumen, multiple layers, or resins, the Sarnafil membrane is simply secured to the roof using the most appropriate method.

Permanent Joints

Sarnafil roofing membrane are permanently fused together by hot air welding at joints and on details. This ensures a durable and watertight finish.

Decorative Trims

Aesthetically pleasing membrane coated edge trims are available in a choice of colours. These provide strong weather resistant roof edges.

Guaranteed Roofing

Designed for the home you want

Homes & Extensions

Throughout the UK thousands of homeowners have invested in a Sarnafil Roof Assured solution. Extending the life of the roof when compared to other materials.

- Environmentally friendly
- Installed by trained fitters
- Low maintenance

Conservatories

Our products have been used on a wide range of applications over the years including dormer window and conservatory applications. Our experience means that whatever the application, we have a solution.

- Lasting performance
- Proven design
- Aesthetically pleasing

Roof Terraces & Balconies

Our solutions have helped transform many unutilised flat roofs and balconies. Existing flat roofs have been converted into impressive design led roof terraces and even roof top gardens. Make use of your open space.

- Structurally proven
- Weather resistant
- Hard wearing

Dormers & Porches

The entrance to your home is important and that's why you need a product that looks great and performs too, whatever the British weather can throw at it.

- Available in a range of colours
- Can improve thermal efficiency
- Coloured edge trims to improve the finish

Garages

Traditional felt based roofs support moss and bacterial growth and generally have poor appearance. That's why home owners have chosen Sarnafil Roof Assured solutions.

- No longer an eye-sore
- No moss and plant growth
- No problem of bacterial growth
